

## *Installation tips for Atlantic's Garden Door*

1. Confirm door and opening (size, style, options, etc.)
2. Check opening to make sure it's square and level.
3. Caulk sill and opening.
4. Center door in opening.
5. For a starting point level and plum door on fixed jamb.
6. Shim and secure fixed side and tack in place.
7. Level plum on operating side and tack in place.
8. Adjust jamb in or out at the top and bottom to ensure contact with the slab and weather stripping.
9. Shim and secure operating side through jamb and header.
10. Margin around door slab must be equal, if not adjust shims and fasten.
11. Check door for proper operation then screw through hinges.
